Women's Struggle for Higher Education in Russia, 1855-1900 - Christine Johanson 1987

Women in nineteenth-century Russia had greater access to medical and higher education than any of their contemporaries in Europe. Women's Struggle for Higher Education in Russia explores the remarkable expansion and upgrading of women's education during the turbulent decades following the Crimean War.

The Education of a Russian Statesman - Nikolaï Karlovich Girs 1962

A New Framework of Special Education in the Russian Federation - Jan de Groof 2000

The Kremlin and the Schoolhouse - Larry Eugene Holmes 1991. . . . an exciting, first-rate contribution to our understanding of Soviet history on several levels. . . . and the relationship between tsarist and Soviet educational policies and practices. --Ben Eklof Larry E. Holmes' book is a fine, expert study of a difficult topic. --The Historian . . . this first-rate work definitely points the way toward a new understanding of the Soviet Union in the 1920s. --Journal of Modern History . . . a succinct and original study of early Soviet education and an engaging disaggregation of the convoluted relations among ideology, politics, and social reality in a revolutionary society . . . . This well-researched, innovative, and insightful study is required reading for any serious student of early Soviet history. --The Russian Review . . . elegantly written, a pithy fast paced, and interesting book . . . . --East West Education Larry Holmes examines Soviet school policy from 1917 to 1931 in its ideological, political, institutional, and social dimensions.

The Education of a Russian Statesman, the Memoirs of Nicholas Karlovich Giers - Nikolai Karlovich Girs 2003-01-01

Civil Society, Social Change and the New Popular Education in Russia - W. John Morgan 2018-09-20 This book explores how social change and changes to civil society are occurring in Russia, considering especially these changes in the education field. It shows how, although the right to lifelong learning is guaranteed by the Russian state, as it was by the Soviet Union, where formal education, based on communist ideology, emphasised the needs of the state over the needs of individuals; in practice at present the educational needs of adults – a wide range of needs, many of which are connected with coping with changing economic, social and technological circumstances – are being met by a range of non-governmental providers, including commercial companies, self-help groups, and community and neighbourhood clubs. This book discusses how this new popular education is both an example of developing civil society, and also helps the development of civil society further, although, as
the book points out, new popular education is also part of a growing educational divide, where motivated, articulate people are taking advantage of new opportunities, whilst disadvantaged groups such as women, the unemployed and the rural poor continue excluded.

**Education in Russia Past and Present** - James Y. Muckle 1995

**School, Reform and Society in the New Russia** - S. Webber 1999-10-11 The Russian school system should have an important role to play in the process of democratisation and the revival and modernisation of the economy in that country. Is it in a position to respond to this task? In this book an analysis is conducted of the attempts to reform the Russian school system in the 1990s, setting the progress made and problems encountered by the schools against the broader context of political, economical and social flux in Russia as a whole.

**Reforming Education in the Regions of Russia** - Mary Canning 1999-01-01 Russia’s educational system, with broad access, and high levels of scholarly achievement, has long been a source of strength. The Soviet system, however, was grossly overcentralized, inefficient, and lacking in accountability. In the last decade, attempted rapid decentralization has not been well designed, since there has been no commensurate transfer of resources and levels of responsibility have remained unclear. Unless corrected soon, the harmful impact on educational quality and equity could be very serious. The purposes of this report are to analyze the nature of the current problems and to discuss policy options open to the Russian Government in its efforts to improve educational efficiency, preserving and even improving equitable access, without sacrificing traditions of academic excellence. This report is based on analysis of trends across the 89 Russian regions and case studies. In its conclusions, the report draws on this regional experience to suggest reform options. Among other proposals, efficiency could be increased by giving schools increased financial autonomy, using of per capita financing formulae, and beginning to rationalize the teaching force and improve its quality. A national system of student assessment might help both to raise quality and improve the equity of access to highly selective institutions. Reforms are required to improve the market responsiveness of first-level vocational education, and especially to avoid excessive and premature specialization. Education practitioners and policy makers will find this publication of interest.

**Teacher Education in Russia**-Ian Menter 2021 "This book examines the history, recent developments and direction of travel of Russian teacher education. It draws on scholarly expertise and professional experience in Russia and locates the policies and practices that are discussed within the context of the continuing global reform of teacher education. Providing a rich description of the trajectory of teacher education in Russia, the book analyses the processes of change between the history, current practice and future directions for Russian teacher education. The chapters consider the relationship between research, policy and practice and examine the respective influences of the former USSR, of processes of wider reform in the Russian Federation since 'glasnost' and 'perestroika' and of globalisation within education. What emerges from the book is that the Russian case is a prime example of 'vernacular globalisation' in teacher education. Many important insights into processes of education reform and some of the major themes in teacher education are discussed, thus providing new perspectives that are likely to be of interest to scholars and researchers of comparative education and teacher education, as well as policymakers"--
