Poetry, Politics and Spirituality-George Lysloff 2012-01-05 Born in Paris, France from a Russian migr father and a Baltic-German mother, the author grewup in poverty, developed into a cosmopolitan minded individual. He studied medicine, worked as a psychiatrist and never stopped writing, fi rst in French, then in German and lastly in English. He immigrated to the US over 50 years ago and continued to expound on his poetry as well as his philosophical ideas, still very much infl uenced by his mostly French, but also more international, almost global views. He got married and sired three children, all quite successful. He presently lives in Wisconsin and the present book is his fourteenth-published product.

Probability and Causality-J.H. Fetzer 2012-12-06 The contributions to this special collection concern issues and problems discussed in or related to the work of Wesley C. Salmon. Salmon has long been noted for his important work in the philosophy of science, which has included research on the interpretation of probability, the nature of explanation, the character of reasoning, the justification of induction, the structure of space/time and the paradoxes of Zeno, to mention only some of the most prominent. During a time of increasing preoccupation with historical and sociological approaches to under standing science (which characterize scientific developments as though they could be adequately analysed from the perspective of political movements, even mistaking the phenomena of conversion for the rational appraisal of scientific theories), Salmon has remained steadfastly devoted to isolating and justifying those normative standards distinguishing science from non-science - especially through the vindication of general principles of scientific procedure and the validation of specific examples of scientific theories - without which science itself cannot be (even remotely) adequately understood. In this respect, Salmon exemplifies and strengthens a splendid tradition whose most remarkable representatives include Hans Reichenbach,
Rudolf Carnap and Carl G. Hempel, all of whom exerted a profound influence upon his own development.

The Rational Mind-Scott Sturgeon 2020-01-19 Scott Sturgeon presents an original account of mental states and their dynamics. He develops a detailed story of coarse- and fine-grained mental states, a novel perspective on how they fit together, an engaging theory of the rational transitions between them, and a fresh view of how formal methods can advance our understanding in this area. In doing so, he addresses a deep four-way divide in literature on epistemic rationality. Formal epistemology is done in specialized languages--often seeming a lot more like mathematics than Plato--and so can alienate philosophers who are drawn to more traditional work on thought experiments in epistemic rationality. Conversely, informal epistemology appears to be a lot more like Plato than mathematics and, as such, it tends to deter philosophers drawn to formal models of the phenomena. Similarly, the epistemology of coarse-grained states boils down everything to a discussion of rational belief--making the area appear a lot more like foundations of knowledge than anything useful for the theory rational decision, such as decision-making under uncertainty. The Rational Mind unifies work in all of these areas for the first time.

A Sword for the Convicted-David T. Wasserman 1990 This book offers the first study of indigent criminal appellate representation in the United States. Using New York City as a research model, it explores the organizational, tactical, and ethical challenges of providing zealous advocacy for every convicted indigent wishing to appeal. The author, a former staff attorney with New York's Legal Aid Society, examines the impact of the Supreme Court’s Douglas decision on appellate courts and representation; presents an empirical study of criminal appeals in New York; and discusses the implications of this research for indigent appellate defense.
