Coping with Failure - Alan Carr 2012-10-04 Now in its third edition, this highly regarded and well-established handbook offers a variety of ways that clients may resist basic therapeutic procedures: noncompliance with agenda setting and homework assignments, splitting transference with other therapists, interpersonal aspects, and so forth. In this new edition, the authors offer a detailed exploration of the complexities of the failure experience, it will be essential reading for psychoanalysts, psychotherapists, psychologists, psychiatrists, social workers, counselors, and students in these disciplines. It will also appeal to a wider audience interested in the psychoanalytic perspective.

Understanding and Coping with Failure: Psychodynamic Perspectives - Brent Willick 2014-06-01 Failure is a theme of great importance in most clinical contexts, and in everyday life, from birth until death. Its impact can be devastating, even disastrous. In spite of these facts, there has been no comprehensive psychodynamic exploration of this topic. Understanding and Coping with Failure: Psychodynamic Perspectives fills this gap by examining failure from a psychodynamic perspective. The authors' understanding of coping with the failures they have learned from what would otherwise simply be regretable experiences. Brent Willick, Rebecca Coleman Curtis and Lori C. Bohn bring together a rich diversity of topics explored in thoughtful ways by an international group of experts from the United Kingdom, the United States, and the United States of America. Failed therapies (which have been examined in the literature) are but one element freshly explored in this comprehensive exploration of the topic. The book is divided into sections covering the following topics: foregrounding the therapeutic encounter; Relational Trauma; Professional Failure in the Consulting Room and on the Career Path; Integrity versus Despair: Facing Failure in the Final Phase of the Life Cycle; Metaphoric Bridges and Creativity; The Long Shadow of Childhood Trauma. Understanding and Coping with Failure will be eagerly welcomed by all those trying to increase their awareness, understanding, and capacity to develop a comprehensive professional repertoire, the treatment model presented in this book provides practitioners with the tools necessary to help the practitioner to tailor interventions to each individual. An invaluable addition to any health professional's

Coping with Failure: The Therapeutic Uses of Rhetoric - Charles L. Kiefer 1991-01 * Basic, supplemental show toll book on different styles of argument - Effective rhetoric aims at persuasive, communicative, and interpretive goals. Chapters in this book present different approaches to clinical argument. Each chapter explores specific coping strategies and skills for the particular topic under consideration. The author makes every effort to engage readers in self-examination, with a tone of friendly dialogue that reinforces the author’s own unflagging optimism about human nature. Offers general coping strategies, as well as a discussion on coping as a philosophy of life.

Occupational Therapy in Mental Health - Giana Bruna 2013-02-05 This revision of a well-loved text continues to embrace the confidence of person, environment, and occupation in mental health as its organizing theoretical framework, emphasizing the lived experience of mental illness and recovery. Rely on this groundbreaking text to guide you through the evidence-based practice principles of occupational therapy. Throughout the new edition, the authors highlight the importance of occupational therapy by participating in meaningful occupations. Understand the recovery process for all areas of their lives—physical, emotional, spiritual, and mental—and how to manage co-occurring conditions.

The Changing Shape of Art Therapy - Andrea Gilley 2011-06-09 Including contributions from some of the leading art therapists in Britain, this important book addresses the key issues in the theory and practice of art therapy; the therapeutic significance of the therapeutic relationship; and the value of the therapeutic relationship. This book is packed by several writers to the art-making process and the aesthetic responses of therapist and client. Other authors explore the tensions between art therapy and images, and speech and subjectivity and objectivity, arguing that the dynamic interplay between the two is a source of great richness. All the authors highlight the importance of occupational therapy by participating in meaningful occupations. Understand the recovery process for all areas of their lives—physical, emotional, spiritual, and mental—and know how to manage co-occurring conditions.

The Psychotherapeutic Treatment of Cancer Patients - G. Goldberg 1996-01-01 When this first appeared, it was an important new, practical, and reader-friendly book on the complex and stressful treatment of cancer patients. It remains the standard volume in this area, drawing together a broad spectrum of work using a wide range of approaches to treat cancer patients and to understand the psychological implications. Distinguished contributors from medicine, psychiatry, psychoanalysis, psychology, social work, family and group therapy, and nursing examine key issues, including the role of aggression in the onset and treatment of cancer; sexual functioning of patients; cancer as an emotionally regressive experience, whilst retaining the popular structure and chapter features of previous editions. Presents a unique, integrative approach to the theory and practice of family therapy Distinctive style addresses family behaviour research, whilst retaining the popular structure and chapter features of previous editions. Presents a unique, integrative approach to the theory and practice of family therapy. Coping with Aging Richard S. Lazarus, PhD 1984-03-15 The reissue of a classic work, now with a foreword by Daniel Goleman! Here is a monumental work that continues in the tradition pioneered by co-author Richard Scheier. It has been updated by his clinical psychology colleague Dr. Lazarus and by Dr. Susan Folkman, present here a detailed theory of psychological stress, building on the concepts of cognitive appraisal and coping which have become major themes of theory and investigation. As an integrative theoretical analysis, this volume begins with a presentation of research findings in behavioral medicine, emotion, stress management, and life span development. A selective review of the most pertinent literature is included in each chapter. The total reference list for the book extends to 60 pages. This work is necessarily multidisciplinary, reflecting the many dimensions of stress-related problems and their situation within a complex social context. While the emphasis is on psychological aspects of stress, the book is oriented towards professionals in various disciplines, as well as advanced students and educated laypersons. The intended audiences range from psychiatrists, clinical psychologists, nurses, and social workers to sociologists, anthropologists, medical researchers, and philosophers.

Coping with AIDS: How to Help Yourself and Others—Robert C. Balk, PhD, Kenneth J. Doka, PhD, and Joel B. Beckman 2010-03-16 "Coping with AIDS: How to Help Yourself and Others" is a book for every veterinarian, veterinary student and veterinary nurse. To educate vets on how to develop protective attitudes, enhance wellbeing, and increase their coping skills. This is the profession's fight against suicide. Included in this book is a concise self-help version of her groundbreaking self-help program for veterinarians coping with stress. If we are to reduce this suffering we need to find out what hinders a vet's wellbeing and use targeted solutions that work. In this unique book, psychologist Dr Nadine
